

Testimonials

"This simple apparatus is marvelous! I no longer have to keep waking up to "retrieve" my cpap hose from trying to follow gravity to fall off my face onto the floor. This holder swings in any direction and keeps the weight of my hose suspended for easy turning in bed. I love it!"

—Missy M, New Orleans, LA

"The Hose Lift System was a real godsend. It manages the hose as if it were a real person standing by the bed all night making sure that the hose doesn't interfere with my sleep whenever I turn in bed. I was so delighted with the performance and price of the System, that I ordered another one to have as a spare. I most highly recommend this system to all side sleepers who turn frequently and you can't beat the price."

—Leonard R, Arlington, VA

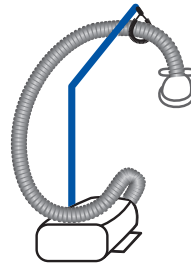

"I can't believe I waited so long to buy this! I thought it was a great idea, but kept putting it off, but finally I ordered it and I can't believe how great it is. I slept so much better, without fighting the hose all night, and it was a bargain (much less than similar products). I would recommend to anyone!"

For Accessories:

- Fixed Base
- Ground Spike
- Mask Hook

Patent Pending

Hose lift

The CPAP Hose Lift by **Arden Innovations**

Suspends your CPAP Tubing Overhead, Rotates with sleep movement, and thus, Eliminates the Hose Hassle inherent with All CPAP systems.

It is essentially
“the 4th element”
of every CPAP System.

‘Including a Hook, upon which your hung mask will magically swivel out of your way, when a twist is placed into the hose, upon first assembly.

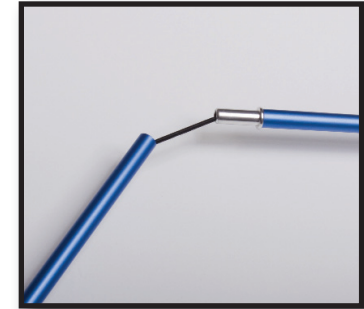

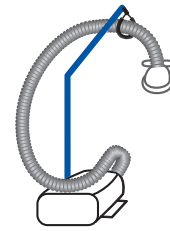

‘Folding, yet always gathered parts, weighing only 6.5 oz (185 g), allows the travel bagged unit: 9”x 5” x 1” (23 x 13 x 3 cm) to hitch a ride with the smallest CPAP Systems now made.

Great at home & travel – slipping under and secured by any and all mattress systems.

Accessories are Available From the Manufacturer:

- A Fixed Base
- A Ground Spike
- Hooks (Hooks for previous versions sold without)

See ardeninnovations.com for details.

Use of the CPAP Hose Lift increases compliant use of one's CPAP System as it reduces:

- P-traps in the hose which collect rain-out during humidifier use, and
- Loss of mask-to-face-seal caused by tugging of an unsuspended hose.
